

PASMA Low Level Access Course Overview

Course Level

User

Who Should Attend

The PASMA Low Level access course is designed for any person who will be using low level access equipment at home or work with a maximum platform height of 2.5m.

Course Aim

This PASMA Low Level access course means that upon successful completion delegates will know;

- Good practices for the safe use of low level access equipment
- Work at height responsibilities of employers, employees and suppliers
- The components used in low level access equipment
- How to access a platform safely and identify the components used in a mobile access tower and low level equipment

Certification

Upon successful completion of this course, each candidate will receive a PASMA certificate and PASMA Card which is valid for 5 years. Both the PASMA Certificate and card are issued digitally and are available in the TowerSure app.

Hard copies are available on request and are chargeable

Pre-Requisites

No formal qualifications or experience are required to attend this course

PPE Requirements

Hard hat, safety footwear and gloves are required during the practical session
