

# Abrasive Wheels

## Course Overview

### Course Level

User

### Who Should Attend

Our Abrasive Wheels training course is designed for anyone that uses abrasive wheels and wants to work with them safely. It is a requirement under The Provision and use of Work Equipment 1998 (PUWER) that all staff using abrasive wheels receive training.

### Course Aim

Upon successful completion of our Abrasive Wheels training course delegates will be able to;

- Understand their responsibilities within the workplace
- Have knowledge of relevant health and safety legislation
- Identify hazards associated with mounting and using abrasive wheels
- Be able to test and inspect Abrasive wheels before use

### Certification

Upon successful completion of this course, each candidate will receive a digital Harrington Safety certificate which is valid for 5 years from training date.

### Pre-Requisites

No formal qualifications or experience are required to attend this course

### PPE Requirements

Safety footwear and gloves are required during the practical session

### Course Duration

½ day

### Theory

Classroom based multiple choice exam
